

SUMMIT

CITADEL

Charlie Coker's Word to Summit Church March 16, 2025 (edited version)

"I saw a huge regional medical center, and it was called, "Summit Healing Center." It had a building off to the right side by the main campus of this medical center and it was called, "Adultery and Fornication Healing Center." I went inside the building with that title, and realized there was construction of another wing off of that "Adultery and Fornication Healing Center." As I walked up to where this construction of this new wing was being built the sign over the new wing was called "Pornification Healing Center." There were meeting rooms called "Fear of the Lord Training Center," there was a "Trauma Team" area, there were meeting and training rooms called "Holiness", "Purity," and "Sexual Identity Recovery Section." There were training rooms for "Holiness," "Righteous Kings" and a "Pure Priest Training." It was a regional healing center. The Lord is going to send you many people, local and national leaders, to get healing and training they need to complete their ministry callings. As you pray into this word the people of God and leaders will come. The Summit is in the beginning stages of its regional effect. You are going to have many come to you. A great people of influence. The Lord said to warn the team "Confidentiality." He says, "Tell them, "Loose lips sink the ship." There is a regional contract and an NDA from the Lord that is sitting on your desk waiting to be signed. Sign it, start praying to position yourself and the leaders in the church and the masses that will start coming and getting healed. So, the warning is, "Loose lips sink the ships." There is a new contract sitting on your desk. Sign it, and it has an NDA. There is some things God is going to tell you and you just can't tell anybody. There is going to be certain people of influence that your team is going to minister to that nobody should know about. If you can't be trusted with those people God won't trust you with everything else. Not every judgement of God must be public.

So, I'm saying to the body, can God trust you?"
